What you'll learn

- ✓ Identify key components of the ML project lifecycle, pipeline & select the best deployment & monitoring patterns for different production scenarios.
- ✓ Optimize model performance and metrics by prioritizing disproportionately important examples that represent key slices of a dataset.

- ✓ Solve production challenges regarding structured, unstructured, small, and big data, how label consistency is essential, and how you can improve it.

L'ORÉAL

There are 3 modules in this course

In this Machine Learning in Production course, you will build intuition about designing a production ML system end-to-end: project scoping, data needs, modeling strategies, and deployment patterns and technologies. You will learn strategies for addressing common challenges in production like

[Read more](#)

Module 1 • 3 hours to complete

This week covers a quick introduction to machine learning production systems focusing on their requirements and challenges. Next, the week focuses on deploying production systems and what is needed to do so robustly while facing constantly changing data.

What's included

 8 videos  3 readings  2 assignments  1 app item

 2 ungraded labs

[Show info about module content](#) ▾

Week 2: Modeling Challenges and Strategies

[Module details](#) ^

Module 2 • 3 hours to complete

This week is about model strategies and key challenges in model development. It covers error analysis and strategies to work with different data types. It also addresses how to cope with class imbalance and highly skewed data sets.

Excellent course! Andrew Ng is an exceptional human being. His teaching skill are impeccable and you as a student actually are interested in what he's telling you and learn more.

EW

★ 5 • Reviewed on Nov 16, 2024

I learned many new perspective on how I can build my machine learning product and some pitfalls that could happen. It gives me fundamental on how do I design my product.

NN

★ 5 • Reviewed on Jul 12, 2021

Introduces you to the basics of MLOps in a well paced manner. Would request to add more examples of structured data sets, as many companies usually are dealing with the related problems.
