Beginner level

No prior experience required

4 weeks to complete

at 10 hours a week

Flexible schedule

Learn at your own pace

What you'll learn

- ✓ Gain a comprehensive understanding of SOLIDWORKS xDesign, from fundamental sketching to advanced assembly techniques.
- ✓ Master the tools and techniques necessary to efficiently design and modify complex parts and assemblies.
- ✓ Develop the skills to create accurate 3D models, parts, and assemblies for various engineering and design applications.

Skills you'll gain

Engineering Drawings Computer-Aided Design Design Elements And Principles SolidWorks (CAD) Technical Drawing 3D Modeling Mechanical Engineering

See how employees at top companies are mastering in-demand skills

Advance your subject-matter expertise

- Learn in-demand skills from university and industry experts
- Master a subject or tool with hands-on projects
- Develop a deep understanding of key concepts
- Earn a career certificate from Dassault Systèmes

Specialization - 5 course series

This Specialization helps users enhance their SOLIDWORKS xDesign skills by solving CAD problems to prepare for the SOLIDWORKS 3D Creator Associate exam.

Access powerful capabilities for Engineering with SOLIDWORKS xDesign at a low price, \$72 (excluding taxes), follow this link : <https://go.3ds.com/CXD1>

In this Specialization, Learners will create and modify sketches, apply material addition and removal features, generate patterns, and assemble parts using mates.

Designed for both classroom and self-paced learning, this module aligns with industry standards and supports skill development for real-world engineering applications.

Applied Learning Project

Learners will work on hands-on CAD projects that involve creating and modifying sketches, applying key modeling features, and assembling parts using mates. These projects simulate real-world design challenges, helping learners develop problem-solving skills and prepare for industry applications, including the SOLIDWORKS 3D Creator Associate exam.

[xDesign Foundations: Sketching and Extrusion](#)

Course 1 • 6 hours

[Course details ^](#)

What you'll learn

Welcome to xDesign Foundations: Sketching and Extrusion, the first course in the SOLIDWORKS xDesign for Education Specialization.

In this course, you will learn how to use SOLIDWORKS xDesign to solve CAD problems. The problems involve creating a 3D object from a 2D sketch using the Extruded Boss/Base feature. You will also learn about the sketch tools & end conditions for extrude feature.

Upon completion of this learning module, you will be able to:

- Create sketch profiles
- Extrude the sketch profiles
- Create sketch fillets/chamfers
- Convert & Offset Entities in a sketch
- Create sketch entities using mirror command
- Use start & end conditions for extrude boss

This course is ideal for beginners and those new to SOLIDWORKS xDesign, particularly students, educators, and early-career professionals in engineering and design.

Software Prerequisites:

3D Creator

Access powerful capabilities for Engineering with SOLIDWORKS xDesign at a low price, \$72 (excluding taxes), follow this link : <https://go.3ds.com/CXD1>

xDesign Advanced Sketching and Reference Geometry

[Course details ^](#)

Course 2 • 8 hours

What you'll learn

Welcome to xDesign Advanced Sketching and Reference Geometry, the second course in the SOLIDWORKS xDesign for Education Specialization. We recommend completing Course 1(xDeisgn Foundations: Sketching and Extrusion) before starting this course.

This course dives deeper into 2D sketching techniques and introduces reference geometry tools to enhance your modeling precision and flexibility.

Upon completion of this learning module, you will be able to:

- Create linear sketch patterns
- Create circular sketch patterns
- Create reference planes and axes.
- Create slots in the sketch profile.

This course is perfect for learners ready to level up from the basics and tackle more advanced modeling techniques.

Software Prerequisites:

3D Creator

Access powerful capabilities for Engineering with SOLIDWORKS xDesign at a low price, \$72 (excluding taxes), follow this link : <https://go.3ds.com/CXD1>

xDesign Revolution and Cut Features

[Course details ^](#)

Course 3 • 9 hours

What you'll learn

Welcome to xDesign Revolution and Cut Features, the third course in the SOLIDWORKS xDesign for Education Specialization. To get the most out of this course, you should first complete the previous two courses in the series.

This course focuses on feature refinement and advanced geometry creation using cuts and revolved features.

Upon completion of this learning module, you will be able to:

- Create extruded cuts
- Apply fillets/chamfers
- Create revolve boss
- Apply revolve cut

This course is ideal for learners who want to explore new tools for creating axisymmetric objects and refining their designs.

Software Prerequisites:

3D Creator

Access powerful capabilities for Engineering with SOLIDWORKS xDesign at a low price, \$72 (excluding taxes), follow this link : <https://go.3ds.com/CXD1>

[xDesign Feature Patterns and Sweeps](#)

Course 4 • 8 hours

[Course details ^](#)

What you'll learn

Welcome to xDesign Feature Patterns and Sweeps, the fourth course in the SOLIDWORKS xDesign for Education Specialization. Prior knowledge from the earlier courses is strongly recommended.

This course teaches powerful modeling tools for creating repetitive or complex geometry efficiently.

Upon completion of this learning module, you will be able to:

- Create mirror feature
- Apply linear pattern
- Apply circular pattern
- Create sweep / sweep cut

This course is perfect for learners looking for advanced design scenarios and time-saving model creation.

Software Prerequisites:

3D Creator

Access powerful capabilities for Engineering with SOLIDWORKS xDesign at a low price, \$72 (excluding taxes), follow this link : <https://go.3ds.com/CXD1>

[xDesign Assemblies and Exam Level Part Modeling](#)

Course 5 • 11 hours

[Course details ^](#)

What you'll learn

Welcome to xDesign Assemblies and Exam Level Part Modeling, the final course in the SOLIDWORKS xDesign for Education Specialization. Make sure to complete the first four courses for a smooth experience.

This course brings together everything you've learned and applies it to real-world part modeling and assembly challenges.

Upon completion of this learning module, you will be able to:

- Create 3D objects from 2D sketch
- Create mates in an assembly

This final step prepares you for real-world projects.

Software Prerequisites:

3D Creator

Access powerful capabilities for Engineering with SOLIDWORKS xDesign at a low price, \$72 (excluding taxes), follow this link : <https://go.3ds.com/CXD1>

Frequently asked questions

^ Do I need to take the courses in a specific order?

Yes, the courses in this specialization are designed to be taken in a specific order. Each lesson builds progressively on the previous one, following a game-like structure that challenges you to tackle increasingly complex design problems.

^ Is this course really 100% online? Do I need to attend any classes in person?

This course is completely online, so there's no need to show up to a classroom in person. You can access your lectures, readings and assignments anytime and anywhere via the web or your mobile device.

^ Can I just enroll in a single course?

Yes! To get started, click the course card that interests you and enroll. You can enroll and complete the course to earn a shareable certificate. When you subscribe to a course that is part of a Specialization, you're automatically subscribed to the full Specialization. Visit your learner dashboard to track your progress.
