Batteries and Electric Vehicles: This course will focus on aspects of battery performance in zero emission vehicles, EV charger networks and second life applications of EV batteries, and standards and regulatory requirements.

Course Introduction

Module 1 • 15 minutes to complete

Module 1: Batteries in Various Application Modes

Module 2 • 2 hours to complete

Module 2: Performance and Reliability of EV Batteries, Range Anxiety

Module 3 • 1 hour to complete

Module 3: Futuristic EV Batteries

Module 4 • 1 hour to complete

Module 4: Second Life and Recycling of EV Batteries

Module 5 • 3 hours to complete

Why people choose Coursera for their career

Felipe M.
 Learner since 2018

"To be able to take courses at my own pace and rhythm has been an amazing experience. I can learn whenever it fits my schedule and mood."

★ 4.6 98 reviews

HH

★ 5 · Reviewed on Jan 4, 2024

This Specialization is very critical for your level to start learning about batteries; it gives a comprehensive overview about this area.

MM

★ 5 · Reviewed on Feb 5, 2024

Enjoyed the course, great intro to the topic can't wait to keep learning more

SS

★ 5 · Reviewed on Sep 16, 2025

Excellent training" is a broad concept, referring to high-quality training that effectively achieves its goals, whether that's in fitness, professional development,
